Forest land and a scattering of homes set the scene around t...

For Sale : **€ 88,000**

Description
Forest land and a scattering of homes set the scene around this residential plot in Kakopetria, with Troodos National Forest Park right next door. The mountain woodland is part of the neighbourhood here, yet the village's restaurants and cafés are within walking distance, so an evening coffee or a meal out never needs the car.

The land measures 1,071 m² and lies in a residential zone, with room for a home of up to two floors. It fronts a dead-end road, which gives it direct road access, and the surrounding mix of forest and scattered houses keeps the setting open and green.

Imagine a long-term family home taking shape here. Mornings could begin with the forest at your doorstep, and afternoons could end with a stroll down to the village for dinner. This is authentic village living in the Troodos foothills, close to nature and to the life of Kakopetria.

A plot where the forest and the village meet, with space for the home you have in mind.
