Description
Family Living and Long-term Investment

The Foundation of Your Future. This spacious residential plot in the serene area of Pano Deftera represents an exceptional opportunity for those seeking to build a custom family home in one of Nicosia's most tranquil suburban corridors. Falling within the H4 planning zone, the property offers a building density of 40% and a coverage factor of 25%, specifically designated for low-density residential development. This profile is ideal for a large, private residence or a luxury villa with extensive outdoor spaces, providing a peaceful retreat while maintaining a secure long-term investment. In March 2026, the Nicosia residential market is experiencing a significant value surge following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net value of land acquisitions. Furthermore, the 2026 market is characterized by a strong shift toward high-quality suburban living, supported by the government's latest green-building grants and infrastructure upgrades. The plot's technical specifications and its placement within a quiet, established neighborhood ensure a secure and appreciating investment, a standard of smart investment we have guided for 3 decades of experience.
