Family Living and Long-term Investment

This residential asset in the quiet community of Kampia represents a premier opportunity for high-quality family living in a serene suburban environment of the Nicosia district. Falling within the H3 planning zone with a 60% building density and a 35% coverage factor, the property is perfectly suited for the development of a grand custom villa or a spacious family residence that prioritizes privacy, garden space, and architectural distinction. In March 2026, the local real estate market has been fundamentally revitalized by the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net position for long-term investors. Furthermore, the 2026 market is bolstered by the latest energy-efficiency grants for new primary residences launched on March 2, 2026, offering significant financial incentives for homeowners incorporating sustainable smart-technologies. The plot's advantageous corner position with an impressive 49 m frontage ensures a secure and appreciating asset, a standard of smart investment we have guided for 3 decades of experience.
